Officials and Employees Honor Master Mechanic

James Scott is Honored With Pres-
entation Banquet. Completes
22 Years Service With
International Co.

James Scott, for 22 years master
mechanic for International Coal &
Coke Co. Ltd., was the guest of
honor at a banquet last Saturday
evening, tendered by officials and
employees of the company. It
marked the completion of many
years faithful service to the com-
pany, he having resigned on Aug-
ust 31, prior to leaving for Winona,
Ont., where Mr. and Mrs. Scott
will reside.

In the unavoidable absence of O.
E. S. Whiteside, general manager;
Supt. John A. McLeod presided.
After a splendid dinner, he spoke
on the long and honorable service
of Mr. Scott, and his service to the
community.

Alex. Beck, proprietor of Star
Creek ranch, an old friend of 40
years, they having known each
other in Ontario, spoke in eulogistic
terms of the guest of the even-
ing; R. F. Barnes spoke for the legal
fraternity; W. L. Rippion for
the Board of Trade, and J. Em-
erson for the company, of which
he is treasurer.

Other speakers were Moses John-
son, inspector of mines; A. J.
Brown, pit boss; C. J. Devine,
John Watson, M. Martello and
Harry W. Clark, who is now in his
24th year of continuous service
to the company.

The presentation of two hand-
some travelling bags, (one for Mrs.
Scott) was made on behalf of those
present by James Taylor, with a
complimentary address.

Mr. Scott in his reply recapitu-
lated his career with the company,
and related some interesting inci-
dents. He also expressed his ap-
preciation of the loyalty and co-
operation received from all ranks,
including the services of Dr. Bor-
den in his remarks.

The evening closed with the sing-
ing of "For he's a jolly good fel-
low" and the national anthem.

Coleman as a whole joins in good
wishes to Mr. and Mrs. Scott. It
was from Ontario they came west
to Calgary, where for six years Mr.
Scott was locomotive foreman for
the C.P.R. In 1903 he came to
Lille as master mechanic for West
Canadian Collieries, of which Mr.
Whiteside was then general man-
ager. When Lille was abandoned,
he took a similar position with the
International, and has seen a great
deal of development here.

For six years he was secretary-
treasurer of the Presbyterian church
in Coleman, and Mrs. Scott also
took a prominent part in church
activities.

It was a far cry from his old home
in Hawick, Roxburghshire, Scotland,
to the west, but it was there
that Mr. Scott was apprenticed as
a machinist. He was truly a son
of the soil, his father owning a
farm which is now carried on by
his older brother, and which has
been in the family for four genera-
tions. But agricultural pursuits
did not appeal to the future master
mechanic, and he decided to launch
out in the field of iron and steel
and steam, with the result that af-
ter completing his apprenticeship
he came to Ontario, where he worked
in the Kingston Locomotive
Works and later on the Brockville
and Ottawa railroad, since absorb-
ed by the P.C.R.

Their daughter, Mrs. J. C. Hodg-
son, well known to many Coleman
friends, is living in Winona; Char-
lie in Tacoma and David is boiler
inspector for the C.N.R. at Winni-

Dutil-Machin Wedding

One of the prettiest of the au-
tumn's weddings was solemnized
on Wednesday evening at Holy
Ghost rectory, when Blanche E-
velyn, youngest daughter of Mr. W.
Machin, was married to Mr. Wil-
fred Louis Dutil, only son of Mrs
A. M. Dutil of Blairmore, Rev
Father Lehman officiating.

The bride looked very charming
in an Alice blue suit of Canton
crepe with Empress Eugenie hat to
match. Her bouquet was of Ophelia
roses. Her only attendant, Miss Phyllis Shone, was becomingly
attired in a sea green dress of
Georgette, with a necklace of Crystals,
and carried a bouquet of pink
carnation.

The groom's only attendant was
Mr. George Kafoury of Blairmore.

After a buffet supper at the
bride's home the happy couple left
with showers of rice for two weeks
honeymoon to Spokane and Seatt-
le. On their return they will re-
side in Coleman.

Took First Prize

Angelo Gentile gathered a num-
ber of baseball players and took
first prize in the baseball tourna-
ment at Natal on Monday. In
cluded in the team were players
from Coleman and other Pass
towns. The prize was \$200.00
The teams played against were
Spokane and Fernie. Dodger Lewis
and Ringland pitched and "Stiffy"
Lewis was catcher.

Coleman Homing Society

Results of Coleman Homing So-
ciety's race from Great Falls, Mon-
day, was as follows:

Birds released at 7 a.m., distance
210 miles, winning bird arrived at
1 p.m.

yds. per minute

W. Pryde 794 9
W. Roughhead 794 2
J. Sudworth 792 0

23 birds were entered.

First prize was \$10 donated by
A. M. Morrison; second a pair of
slippers donated by Fred Astrudus.

Entertained at Pincher

On Friday evening the Orange
lodge members and their wives
motored to Pincher Creek, and were
splendidly entertained. Six cars
went and after the degree work an
open session was held. Rev. W.
Barlow of St. Cyprian's Indian
school, Brocket, gave a very inter-
esting address on "Four Crises of
the British Empire," and Mrs.
Robert Holmes of Coleman recited
one of her Scottish poems in her
usual affable style.

A very much appreciated feature
of the evening was the chicken sup-
per served by Pincher ladies. Cole-
man party reached home about
3 a.m. Saturday.

A list of ranges and heaters is be-
ing prepared by Pattinson's hard-
ware store. Watch for it; you'll
find some very good values.

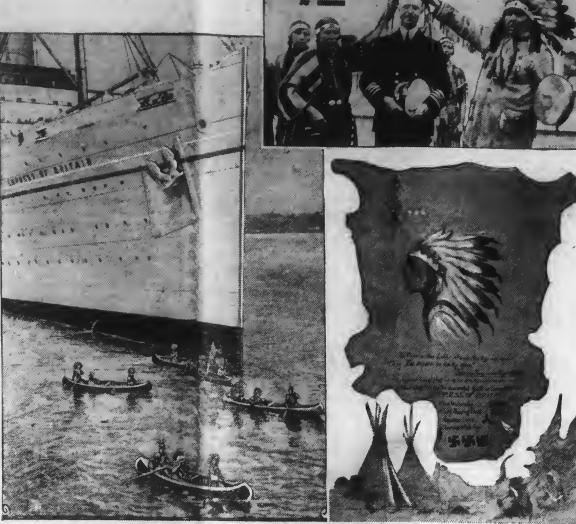

IN MEMORIAM

IN LOVING MEMORY of our dear
son, Albert Brocklehurst, who died on
September 8, 1928. Inserted by Mr. and
Mrs. Samuel Brocklehurst, Calgary.
"Ever remembered by his loving
parents."

It is interesting to note that on
April 26, 1933, Mr. and Mrs. Scott
(D.V.) celebrate their golden
wedding, and their many friends
here will join in hoping that their
fifty years of married life will be
crowned with happiness and pleas-
ant memories of the various places
in Canada where they have lived.

SAGO TEHONIATARAKAKOWA

"Greetings, Chief Swiftest Rider
Of Mighty Waters!"

Honours have been heaped upon Captain R. G. [to his feats of seamanship with the big white "war-
chow." Meeting the Empress of Britain in their
gaily decorated birch-bark canoes a score of braves
from the Six Nations Indians of the Atlantic for
the British Empire by all classes of people but some
have been more sincerely offered than the recent
tribute of the Six Nations Indians.

Camped at Loretteville, Quebec, where they
are staying in a village which the ancients call the
redman's paradise, members of the Six
Nations, under the leadership of 81 year old
Chief Wolverine recently honoured the Canadian
Pacific Commodore by adopting him into the tribe
and conferring chieftainship upon him as a tribute
to their chief now. Left: Chiefs and braves in their

Home-Taught Fears

What has been described by one writer as "far and away the most conclusive tests of character ever made, since Adam and Eve reared the 'Cain' and made a moral success of it" are a moral failure of the other," were the elaborate studies recently undertaken by the University of Colorado and Yale Universities. These scientists tested the character attitudes of over 10,000 school children from six to sixteen years old, under "normal" school and home conditions. The children did not even know they were being scientifically studied. The net result of these intricate and reliable tests was to show that among agencies in having the greatest influence in building human character, the "home" outweighed the school, the church, the Sunday School, the movies and sports all combined.

This is fact number one for parents to consider. The second in importance is where and how home influence and training makes or mars the child life within its walls. There are three phases of home life out of which are developed the emotional patterns or habits which will make boys and girls into self-reliant men and women, able to meet an imperfect world with high ideals of their own. These phases are, first, the attitude between husband and wife; second, the attitude of sisters and brothers toward each other; and third, the attitude of parents toward children.

Let us take a look at the way in which these home attitudes foster the one emotional attitude which affects our lives more than any other and extends as a sort of background through nearly all the others. This is self-confidence as opposed to fear—not fear of some special thing but a rather generalized fear of life itself.

Vast numbers of people who will face death on a moment's notice, who go through all sorts of real dangers without a quiver, yet a sort of underlying fear of life's possibilities that seldom leaves them. It is easy to fall into these generalized fears, and there are thousands of ways in which amazing discoveries are made by doctors during the examinations in the World War, that so many people—men and men had all their lives been convinced that they had heart or kidney trouble or some similar malady and had feared to undertake arduous occupation for that reason. In nearly all cases their fears had been started by hearing symptoms discussed at home.

What is "fear"? anyhow? With the exception of the world of work in the last thirty years on fear, and there find there are three distinct kinds. The first is natural or biological fear—the kind that preserves you from natural perils; the second is intelligent or constructive fear—the kind you get from sound, healthful education; and the third is pathological fear—destructive fear that comes from a wrong view of life, from wrong comparisons of yourself with other people, from wrong attitudes toward your job, and from telling yourself constantly you are not as important as others. As a rule there are just three people who ever tell you are no good—your parents, your brothers or sisters, and yourself. And nine times out of ten you have begun to tell yourself you are no good because your mother, or father, or brother, or sister, in some way first destroyed your self-confidence.

For example, you hear many people assert they are naturally afraid of lightning, or burglars, or something of the sort. This is not true, because there are but two things that people are "naturally afraid of." The first is a loud noise, and the second is the sense of failing. Dr. John Watson and his students have tried in hundreds of ways to frighten babies, but these are the only two ways in which they have succeeded.

Many mothers say, "My child has always been afraid of the dark." Oh, no, the mother taught it to be afraid. She put the bed to bed and went out and slammed the door, or talked loudly, or scolded, or dropped a basin on the floor, etc., when it got a little older, the mother talked about being afraid of the dark, herself, or told the child something dreadful that was likely to happen in the dark.

And it is just this way that children are taught to be afraid of life. Parents need to be taught on the margin of life which they actually teach their children to be afraid of life by teaching them from responsibility. They are missing the greatest educational opportunity this world offers when they fail to put as much responsibility on the child as he can reasonably carry just as early in life as is possible. In this way you build up habits of success instead of habits of failure, courage habits instead of habits of fearing life and dodging its responsibilities.

This has nothing contrary to the duty of teaching the children the second kind of fear—intelligent fear—which is merely teaching them good judgment in avoiding dangers and destructive habits. This kind of fear is merely the negative side of character building and should be carried through to the constructive or positive side—that is, to the development of ideals and ambitions, of goals to be reached and battles to be won. The greatest duty of parents is to fill their children's minds with the belief that they can meet their duties and battles with satisfaction and success.

When intelligent fear is carried to the point of exaggeration it becomes the third fear—diseased or pathological fear. The way out is to develop logical judgment of the situation and those of our friends. When this is done honestly, when you think "in detail" of your own powers of body and mind and compare them with these same qualities in others, you will be astonished to find that you are superior in most respects to the very people you have taught yourself to be afraid of.

But the great lesson for parents is, that all these attitudes, both destructive and constructive, are chiefly developed in the home. And since Nature has given us but two inborn fears, and all others are learned, and since the home is the greatest agency in the world for teaching all our emotional attitudes, the very large question every family should answer is: "Are we as parents or brothers and sisters teaching ourselves and one another to meet life with fear, self-deception and doubt, or are we trying to be a daily inspiration to one another to meet life with the self-confidence and good cheer that calls out each one's best energies?"

The answer to these questions will have more effect on the happiness and success of every member of the family than anything that ever has been or ever will be taught in school or college.

A Matter Of Taste

Canadian ice-cream is delicious but Canadian coffee "almost undrinkable," in the opinion of a group of British cadets who have been attending rifle schools in this country. The cadets said they liked Canada "immensely" and that everyone would endeavour to come back.

Poison ivy is a native American plant.

Four To A Man

Policeman: "I have found a case containing whisky."

Prohibition Officer: "Good, I will send a dozen customs officers to deal with it."

Policeman: "I think six men will be enough—there are only two dozen bottles in the case."

Goodwill, like a good name, is got by many actions, and lost by one.

A Few Doses Did It

Mrs. R. Coulter, 918-11th Ave. E., Calgary, Alta., writes:—"Last summer my youngest son was very bad with summer complaint, and everything he ate he would vomit, and he got a headache very much worried. I could not get him discharged checked, so I went to the druggist and he gave me a bottle of Dr. Fowler's Extract of Wild Strawberry and gold. He would stop the trouble if anything would. After I had given the boy the first few doses I noticed the discharges were being checked, and it was not long before he was well again."

Evolution Of Peace

Nations Of The World Should Place Armed Forces Under Control Of League

A proposal that the nations of the world place their armed forces under the control of the League of Nations and a prediction that France would lead the way at the 1932 disarmament conference were made by Joseph Paul Boncour, foreign affairs chairman of the Chamber of Deputies in a statement to the Associated Press.

"I mean that the council of the League of Nations when face to face with a case of proved war of aggression should be empowered under article 15 of the League Covenant to make use of them to settle a war crisis."

"Are other nations, like us, ready?

Are they willing to let their permanent air, naval and land forces under the control of and at the disposition of the League of Nations?" By this gesture the problem of parity might be solved."

He said that French circles yearned for perpetual peace and are growing more insistent over next year's disarmament conference.

The statement said that in his opinion the disarmament conference would be the gravest event since the signing of the war treaties and a decisive step in the evolution of peace.

"Upon its success or failure depends the future of peace," he said. "I mean that the failure of the disarmament conference would be the signal for the re-armament of powers which under the peace treaties are subjected to special limitations."

Inasmuch as M. Paul Boncour is acknowledged as France's greatest authority on disarmament and is certain to be one of France's chief delegates to the disarmament conference in Geneva next February, his statement was considered to be of such far-reaching importance that it will give an entirely new angle to the struggle for the reduction and limitation of armaments.

Air Mail Service

To Aklavit Necessary

Paying Its Way and Must Not Be Abandoned

Whatever happens to the prairie mail that to Aklavit simply must not be abandoned. It was stated by Mr. Veniot, former postmaster-general that under the old system of delivering mail by dog teams in winter and by boat in summer, it took many weeks to reach its destination and even then the service cost the department \$41,000 a year. Contracts for delivery by airplane called for only some \$6,000 additional and instead of giving people of the far north a break, it cost twice a year they have been receiving. The delivery of the northern air service under a two-cent rate today is paying its way and has a surplus. These facts should remove the Aklavit service from any general plan of cutting out the air mails.—Edmonton Journal.

Saskatoon Fair

Operating Loss This Year Shows Decrease Over That Of 1930

Operating loss on the 1931 Saskatoon Exhibition, including all fine charges against the exhibition board, amounted to \$16,843.43. It was announced at a meeting of the finance committee. This shows a substantial decrease over the exhibition loss in 1930.

Total attendance was 64,853, with 32,782 attending the grandstand.

In view of conditions this operating loss was considered very reasonable and the exhibition management has operated about \$5,000 under the amount budgeted in 1930.

Externally Or Internally. It is good—when applied externally by brisk rubbing, Dr. Thomas Collector Oil opens the pores and penetrates the tissue, touching the seal of the throat, and removing the irritating residue. Administered internally, it still the irritation in the throat induces coughing and will relieve infections of the bronchial tubes and respiratory organs. Try it and be convinced.

Big Ben is to have a better home. The tower which contains the large clock at the House of Parliament in London, England, is being renovated with new facing stone, cut at the quarry to fit.

The so-called flying squirrels are really gliders, gliding from a higher to a lower point by aid of a membrane along the side of the body.

Customer—"How's your tongue sandwich?"

Waiter—"It speaks for itself, sir."

The deepest safe diving limit for any submarine yet constructed is 450 feet.

W. N. U. 1906

ACIDITY FOR 10 YEARS

Before he Found the Remedy

Many people endure suffering unnecessarily. This man did not know ten years ago what he knows to-day, he would have been spared a great deal of suffering.

"I feel I must write a few lines to express my appreciation of your Kruschen Salts. I have suffered for 10 years from chronic acidity. I used to eat a meal and feel as though I had nearly everything, until I was advised by a friend to try Kruschen, and have taken for the last two months, and have been free from acidity ever since."

Kruschen Salt swiftly neutralizes acids, takes all the tartness out of it, and gives a taste of the sea.

And by stimulating your organs of elimination to perfect regular action, Kruschen will prevent any harmful acids from entering your system.

After that you'll experience no more misery after meals. Kruschen will keep your appetite strong and invigorated blood to your body. You'll feel wonderfully energetic and healthy as humanly possible to feel.

Recipes For This Week

(By Betty Barclay)

ORANGE CHEESE SALAD

4 oranges.
2 packages of Philadelphia cream cheese.
1 cup toasted coconut.
1 head lettuce (leave leaves).
Pare oranges and separate sections. Mash cream cheese. Make into balls and roll in toasted coconut. On lettuce covered salad plates, place orange sections with 2 or 3 cheese balls. Top with a spoon of mayonnaise.

TOMATO-RAISIN CONSERVE

2 quarts fresh, ripe tomatoes.
4 sour apples, peeled, cored and cubed.
2 lemons, cubed.
2 pounds sugar.
6 sticks cinnamon.
1 small piece of mace.

(Lie slices in cheese cloth bag.) Boil all ingredients, except sugar, until a thick mass is obtained. Add sugar slowly and boil about 15 minutes or until jelly stage is reached, which is when the mass sheets from the side of the spoon. One cup of just nut meat may be added to this just before removing from the fire. Pour into glass jars and refrigerate.

The Proven Asthma Remedy. Since asthma existed there has been no lack of much heralded remedies, but they have proved short lived and temporary. The following reprinting of Dr. J. D. Kellogg's Asthma Remedy has given it a place in the field of medicine which no other can claim. It is a simple remedy that cures asthma and will stand the test of time. Miller's Worm Pill will help to exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately prove fatal.

Because these worms are of the hook variety that cling to and feed upon the interior tissue, Miller's Worm Pill will help to exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

Nations Will Uphold Britain

Prestige Must Be Safeguarded Or World Will Suffer

Engrossed as we are in our own troubles in Canada, we may not realize how very serious is the situation in the Mother Country. Yet the outward signs, visible to the world, are sufficient alarming. We may be sure, when Sir Labour Prime Minister must not only interrupt his own holiday but feels it necessary to call into council the leaders of the Conservative and Liberal Parties to devise emergency measures to meet an imminent crisis, that the crisis is grave and, indeed, almost desperate.

British stability is a world asset. If anything serious were to happen to the age-long leader of world finance and trade, the whole world would suffer. It is inconceivable under such circumstances that the prestige of British institutions will not be safeguarded by all the power which the leaders of finance in other nations may not relish the opportunity to rush to the rescue of the Colossus of other years—but they will rush. They dare not permit anything really dangerous to occur.—Montreal Star.

Scientists Sample Arctic Sea Bottom

Interesting Report Received By Radiogram From Submarine "Nautilus"

A copyrighted radiogram from the submarine "Nautilus" to the New York American tells how scientists aboard the vessel have sampled the bottom of the Arctic Ocean 5,220 feet from the surface.

The report, says the radiogram from Capt. Sir Hubert Wilkins, commander of the North Pole submarine expedition, was a column of Arctic mud 17 inches long and one inch thick. It was "brown from the surface for 15 inches and then pale blue, representing the deposits in polar waters of hundreds of thousands or perhaps hundreds of millions of years.

Worms in children work havoc. These pests attack the tender lining of the intestines and, if left to pursue their ravages undisturbed, will ultimately prove fatal.

Because these worms are of the hook variety that cling to and feed upon the interior tissue, Miller's Worm Pill will help to exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

Something To Crow About

Alberta Producing Half Of Western Wheat Crop This Year

Central and northern Alberta today has the best wheat crop prospect in three years.

For the first time in history, one-half of the total wheat crop of the West will be produced in Alberta.

Alberta will have the lowest cost of planting and harvesting in 20 years.

The five-cent government bonus on wheat will mean over \$6,000,000 to Alberta farmers this fall.

Dairy live stock and poultry sales add another \$1,000,000 each week to Alberta's farm income.

Alberta has every reason to face the future with unshaken confidence.—Edmonton Journal.

Cost Of Launching a Novel

Publication Fees Usually Average Around Seven Thousand Dollars

It costs about 7,000 dollars to launch an ordinary novel. Sometimes it can be done for less, but that figure about averages publication costs, including of advance publicity and advertising.

Only three book publishers are not taking really big chances of losing money on the less spectacular books such as biographies and educational tomes. There's always enough advance sale and orders from libraries to cover costs on books of that type.

Always keep Douglas' Egyptian Liniment at hand, ready to bring immediate relief to burns, sores and felonies. Stop bleeding at once. Prevent blisters and other skin eruptions. Splendid for sore throat and quinsy.

Ontario Mines

Output Shows Decrease In First Six Months Of Year

The value of Ontario mineral output for the first six months of 1931 shows a 12.04 per cent decrease over the same period last year, the half-yearly report of the Provincial Department of Mines shows. At the same time, gold production of the province reached the record total of \$20,608,194.

Production to the end of June this year amounted to \$50,997,740, as compared with \$53,235,582 for the corresponding period of 1930.

TO KEEP YOURSELF HEALTHY

The lot of most people is much indoor work and little exercise. That's why it's sensible, so often, to give the system a thorough cleansing with Dr. Carter's Little Liver Pills. All vegetable, 60 years in use.

U. S. Farm Board Sells China Wheat To Feed Flood Sufferers

Washington, D.C.—The United States Farm Board has sold China 15,000,000 bushels of wheat. Completion of the negotiations for the transaction was announced by President Hoover. The grain will be used to feed the thousands in the flooded regions along the Yangtze River.

Carl Williams, farm board member, said a minimum of 50 per cent. of the wheat would go as flour and that shipments were expected to begin the latter part of this month. The Chinese Government, he said, agreed to pay equal instalments on the wheat in 1934, 1935 and 1936. The price is to be market quotations at the time of shipment with interest at 4 per cent.

Chairman Stone of the farm board said recently he would endeavour to provide that some of the grain involved in the Chinese negotiations, then in progress, be carried in U.S. bottoms.

President Hoover said the Chinese Government had undertaken "the transportation" and would give equal opportunity to U.S. ships to carry the wheat.

Williams said U.S. shipping interests wanted to carry the grain at their "own rates." He added they were charging from 50 cents to \$1 more a ton on the average for shipments to China than the vessels of other nations.

General Disarmament

Legion Believes War Should Have No Place In Civilized World

Montreal, Que.—Reaffirming their belief that war has or should have no place in a civilized world and approving the campaign of the League of Nations Society in Canada to advance the cause of general disarmament, delegates to the Canadian Legion Convention unanimously passed a resolution to that effect. The resolution was qualified, however, as follows: "This resolution of approval is not, however, to be taken as approving of disarmament by individual nations, and expresses the opinion that it is the duty of Canada to maintain adequate defence forces."

Costs Can Be Reduced

Finding Of Conference On Production Expenses Of Wheat

Calgary, Alberta—Wheat producers attending conference here with a view to cutting down production expenses closed their sessions with the decision that costs can be reduced, and wheat will continue to be for many years to come the basic western crop.

The conference formed the second part of a two-day program, the first being field trials and tests of farm machinery at the Midnapore Hall of Senator Patrick Burns.

Harvesting Operations Reported As Progressing Very Satisfactorily

Ottawa, Ont.—Harvesting of seasonal crops has progressed satisfactorily in all parts of Canada during the past two weeks, says the Dominion Bureau of Statistics in its crop report.

On conditions in the prairie provinces, the report points out that harvesting of wheat has progressed satisfactorily. Operations were delayed somewhat by rainfall. Although delaying harvesting a few days the rains were however, very beneficial in improving the feed and pasture situation, especially in Manitoba.

Hail damage has been done by hail at several points in Saskatchewan and Alberta, but no new developments in the root situation were reported.

In Ontario the weather has been good for harvesting and yields are generally satisfactory. Favourable weather in British Columbia has accelerated harvesting. The quality of fruits and vegetables is generally good. Harvesting of cereals is practically completed in Quebec.

The detailed review of crop conditions follows, in part: During the past week Manitoba received substantial rains which have delayed harvesting operations for the time being. The rainfall, however, was urgently needed to improve the pasture and feed situation. Approximately 90 per cent. of the wheat crop is cut and some threshing is completed.

Woman Delegate From Canada

Mrs. McWilliams Of Winnipeg, To Attend Conference In China

Winnipeg, Man.—The only woman delegate from the Dominion, Mrs. F. McWilliams, Winnipeg, has been appointed by the Canadian Institute of International Relations to attend the conference of the institute in Hangchow, China, October 24 to November 4.

Vice-president of the International Federation of University Women, Mrs. McWilliams is well known throughout the Dominion for her writings on international politics. She attended the Geneva Conference of the International Labour Office last year as representative of the Canadian Government in an advisory capacity.

Second Ship To Churchill

Will Pick Up 7,000 Tons Of Grain For Shipment To Europe

Montreal, Que.—The steel steamer "Warkworth" sailed from Montreal September 1, for Churchill, Canada's new grain port on Hudson Bay, to pick up 7,000 tons of grain in an experimental shipment to Europe. The S.S. Farmworth sailed August 29, from Newcastle-on-Tyne for Churchill.

The "Farmworth" is expected to reach the port about September 12, with the "Warkworth" due about two days later. With but little ice in Hudson Bay, conditions appear to be favourable for the experiment, according to local shipping men.

British Films

May Erect Chain Of Theatres In Canada To Show Pictures

Toronto, Ont.—British motion picture producers would like to bring the Canadian market regardless of the attitude of the Canadian motion picture industry, declared F. W. Field of Montreal British Trade Commission in Canada, addressing a meeting with the members of the National Council of Women at the Canadian National Exhibition here.

If Canadian theatre owners were not more friendly to British pictures he predicted the erection of a chain of British theatres to show films from that country here.

Ontario Highway Section

Toronto, Ont.—Premier Henry announced that work on the two sections of the Trans-Canada Highway for Ontario's unemployed, will start October 1. While September 1 was previously given as the starting date, definite plans for operation of work camps are still being formulated.

Duty On Magazines

Customs Tariff Now In Effect Affecting American Publications

Ottawa, Ont.—Nearly 450 periodicals are contained in the partial list, issued by the Department of National Revenue here, of magazines upon which a customs tariff will be imposed as from this date.

The department makes it clear that the list is not complete, and that a further list will be issued "when the necessary information is furnished to the department by publishers of other periodical publications."

Three sections and two sub-sections of the customs tariff—148B to 184D inclusive—are applicable to all magazines imported into Canada from foreign countries, such publications from Great Britain and other parts of the British Empire not being affected, nor is there any provision for the imposition of a duty on the periodicals' publications issuing from trade treaty countries.

The list covers United States magazines exclusively. A number of those of the short story type are boosted in price, by reason of the new tax, to a cost that may cause their total disappearance from Canadian news stands. These came within the classification of "periodicals or newspapers consisting largely of fiction, etc."

Scientific publications, religious magazines and others devoted to comment on public and cultural affairs, to and travel and exploration, which carry articles of an educational character are listed free.

Young Wins Swim Marathon

Toronto Swimmer Defeats Field Of 180 Contestants

Toronto—George Young, Toronto, who for years has sought vindication, found it today. Meeting Lake Ontario where the lake was at its cruellest, Young defied it. He smashed through cold, cold waters for 15 miles to win the world's professional swimming championship, \$10,000 in cash, and vindication in the eyes of Toronto's citizenry. In the last grueling drive, he crossed the finish line shortly after 7 o'clock, swim perhaps 20 feet further, then collapsed. The lake had its way in the end—but not before George had proved beyond all doubt his superiority over a field of 180 contestants who started one of the cruellest, most brutal grinds in the history of swimming.

Young was leading by nearly a mile at the finish line, and all talk of his being a "front runner," the boy who quaked under pressure, was set at rest by his performance. Gone, too, are the cutting and untrue remarks that the Catalina victory of 1927 was a "fuke."

The George Young winners were:

George Young, Toronto, first, \$10,000.

Bill Goli, New York, second, \$2,500.

Warren Anderson, Sydney, N.S., third, \$1,000.

And these were the only swimmers to finish the ordeal.

Visiting Mountie Posts

New Commissioner Has Left Ottawa On Inspection Tour

Ottawa, Ont.—Western divisions of the Royal Canadian Mounted Police are to be visited this month for the first time by their new commissioner, Major-General J. H. MacBrien. He has left on a tour of inspection that will take him to Winnipeg, Regina, Lethbridge, Edmonton, Prince Albert, Vancouver and Victoria. Major MacBrien was recently appointed successor to Col. Cortlandt Starnes.

in southern districts. A light frost was reported but only slight damage is evident.

In Saskatchewan approximately 70 per cent. of the wheat crop is now cut and threshing is under way in some areas. Feed crops and pastures will benefit from the rains received, and late crops will progress if not damaged by frost.

"Cutting of Alberta is well advanced in southern districts and is now general in central and northern areas. Rains have delayed operations in the central and northern areas, where crops are heavy, and damage may result if further rains are received before harvesting is completed."

"Cutting of grain is practically completed on Vancouver Island and mainland, while harvesting is becoming general in northern area. Wealthy apples, peaches, pears, canabolas and vegetables are being shipped in volume and the quality of these crops is generally good."

"The following half reports were received from correspondents in Saskatchewan and Alberta:

"Widespread damage done to crops as a result of storm of August 28 at Estevan, Arcola, Cariely, Aida, Wainchoppe, Redvers and Maryfield in Saskatchewan."

"Half claims received from Didsbury, Crossfield, Michichi, Delia, Hanna, Richdale, heavy damage at most points in Alberta."

Celebrates Birthday

Sir George Foster, member of the Canadian Senate, who celebrated his 84th birthday on September 3. He is the last survivor of any of Sir John A. Macdonald's Cabinets in the wider Dominion sphere.

Market For Wheat In China

Our Surplus Wheat Would Save Thousands Of Chinese Now Starving

Montreal, Que.—Canada's surplus wheat in elevators throughout the country could save the lives of thousands of Chinese now starving in the areas flooded by the recent river and possibly be the means of furnishing a future outlet for Canadian wheat that would prove of great benefit to this country. Wong Han, prominent member of the Montreal Chinese colony, stated here.

He thought that there was an excellent market for the hard wheat of Canada in his homeland. "The Chinese," he explained, "will never eat bread to any great extent, as it is a food absolutely foreign to them and would require cooking equipment not found in the average Chinese home. Canadian wheat, however," he went on, "could be used freely in the preparation of dumplings, dishes, such as the making of dumplings and noodles, and its use for this purpose would take millions of bushels of Canadian wheat yearly."

Young was leading by nearly a mile at the finish line, and all talk of his being a "front runner," the boy who quaked under pressure, was set at rest by his performance. Gone, too, are the cutting and untrue remarks that the Catalina victory of 1927 was a "fuke."

The George Young winners were:

George Young, Toronto, first, \$10,000.

Bill Goli, New York, second, \$2,500.

Warren Anderson, Sydney, N.S., third, \$1,000.

And these were the only swimmers to finish the ordeal.

Economic Situation

Solution Of Difficulty May Lie In Shortening Of Working Hours

Saskatoon, Sask.—Solution of the present situation lay perhaps in shortening of working hours while maintaining the present standard of living, stated Hon. Howard McConnell, Provincial Treasurer, when speaking to a local service club. Mr. McConnell dealt with the economic situation generally and stressed the need of great economy in the province. He predicted that revenue this year would fall far short of requirements, laying the blame for this largely at the door of the agricultural situation in the south of this province.

Young was leading by nearly a mile at the finish line, and all talk of his being a "front runner," the boy who quaked under pressure, was set at rest by his performance. Gone, too, are the cutting and untrue remarks that the Catalina victory of 1927 was a "fuke."

The George Young winners were:

George Young, Toronto, first, \$10,000.

Bill Goli, New York, second, \$2,500.

Warren Anderson, Sydney, N.S., third, \$1,000.

And these were the only swimmers to finish the ordeal.

Buried In Old Churchyard

Body Of Sir Hall Caine Rests On Island He Loved

Douglas, Isle of Man.—The burial of Sir Hall Caine, eminent novelist who died at an advanced age, took place on Sept. 5, interment being in the Maughold churchyard, on the island that Hall Caine loved. It is asserted that Maughold churchyard is the spot where Saint Patrick landed in the fourth century.

GRAND CHAMPION

Holding the record maintained in all showings at the Canadian Pacific Exhibition, Vancouver, the Strathmore herd from the Canadian Pacific Railways' supply farm in Alberta is unbeatable in the bull classes. "Gano Paul Bruce," awarded senior and grand champion for bulls at Vancouver, adds another red ribbon to his decorations from the season's major exhibitions. "Gano Paul Bruce" holds three firsts and the grand champion from Calgary, Saskatoon and Regina, and took second place at Edmonton, Victoria, Spokane International, Washington State Fair, Yakima and Puyallup. His record in 1930 made him first prize aged bull in Holstein classes at Vancouver, Victoria, Spokane International, Washington State Fair, Yakima and Puyallup. Also in 1930 he claimed the grand championship at Spokane, Yakima and Puyallup. He goes now, with other Strathmore Farm exhibits to the north Pacific Coast fairs.

Ideal Of Disarmament Sacrifices Security Of Britain, Says Jellicoe

Toronto, Ont.—Great Britain's cruiser and destroyer strength is becoming "totally inadequate," Admiral of the Fleet, Earl Jellicoe, asserted here. Speaking at a dinner by the Navy League of Canada, Lord Jellicoe gave warning that the security provided by the British fleet has been sacrificed for the ideal of disarmament.

"We have set an example in disarmament which no other nation has followed," he declared. "We have not only dropped our navy, but done nothing for our coast fortifications. The results may be laudable, but involves the greatest possible risks. We all hope the war is over, but the will to fight has not gone from this world. One has only to look at such things as general strikes to understand that."

Introduced by Rt. Hon. Arthur Meighen, former Prime Minister of Canada, who said that Canada should not escape its responsibility to play a part in naval defence, the duty being the same as it was in war years, Lord Jellicoe carefully traced British naval policy since the Great War. In 1920 he had submitted a report on Canada's needs for naval defence, based entirely on conditions obtaining in 1919, when the British fleet was supreme.

"At Geneva," said the admiral of the fleet, "we thought the total for cruiser and destroyer tonnage suggested to us by the United States was totally inadequate. We considered, then and now, that we cannot

safely have less than 70 cruisers." Yet it now appeared, he continued, that in 1936 Great Britain would have less than 50.

The portion of Great Britain on the sea is unique, Lord Jellicoe emphasized. "Japan is not so dependent on sea communications. Nothing in the United States. Cutting off sea communications," he declared, in slow, deliberate words, "would mean the starvation of our people in about a month."

He had stressed this fact at Geneva in 1927, said the admiral. An American admiral had then replied that the United States was in a similar position, "I asked him in what direction," Lord Jellicoe went on with a smile, "and he said, 'Manitouane.' I told him the American people had never eaten manganese."

At London, Lord Jellicoe continued, Great Britain had agreed to accept a limit of 50 cruisers until 1936. "There are many of us who regret that decision," he declared.

Policitely, he declared, were concerned of the mistake; Rt. Hon. David Lloyd George, said 12 years ago, "the sea is our life." Lt. Hon. J. Ramsay MacDonald had said more recently, "the sea is us!" The admiral added: "But I'm afraid governments don't always live up to what is thought necessary."

It was untrue to use cruisers until they had been in service 20 years, said Lord Jellicoe. The British Government was doing this, although many of the cruisers had been built under wartime stress and seen war service, making their efficiency questionable.

He considered 16 years the limit.

Governor-General Presided

Opened Convention Of Canadian Bar Association At Murray Bay

Montreal, Que.—His Excellency, Lord Bessborough, Governor-General of Canada, left Montreal on board the S.S. Tadoussac for Murray Bay, where he presided at the opening of the Canadian Bar Association Convention. His Excellency was accompanied by his son, Viscount Duncan, and A. F. Lascelles.

As the vice-regal party boarded the steamer, the Governor-General's flag was unfurled at the masthead, the S.S. Tadoussac thus having the honour of being the first steamer in the lower St. Lawrence to fly the emblem of the King's representative.

New Freight Tariff Protested

Calgary Board Of Trade Draws Attention To New Ruling

Calgary, Alberta.—Protest to the Board of Railways Commissioners at Ottawa over the filing of a new tariff by railway companies which would make shippers pay freight on dead or crippled animals was made by the Board of Trade here.

The board claimed that a double charge be made under the new tariff, but railway officials replied that the tariff had been in effect in Ontario for a year and no complaints raised.

Believes Constitutional Questions Should Be Decided In Canada

Too Many Bankruptcies Are Entered Into Lightly In Canada

"That," Mr. St. Laurent declared in uttering an opinion to which he committed no one but himself, "would be a first step in making our supreme court really supreme. I am confident that with such a ruling many constitutional questions would be finally determined here, whilst there would remain open to the Dominion and the provinces as autonomous and independent governments in their respective spheres, a further tribunal quite as satisfactory and as expeditious and in every way as convenient, as one which might be set up under the resolution of the imperial conference of 1930."

Mr. St. Laurent's consideration arose out of his treatment of the proposed statute of Westminster.

"There is without doubt, a growing feeling in Canada that at least in ordinary disputes between private parties, final decision should be arrived at in our own courts," the president continued.

NOTES AND COMMENTS

Despite what individuals may say and think as to governments relieving depression, every individual has to work out his own salvation. No government on earth can do for the individual what should be done by and for himself.

"Canada gives one the impression of being a very wonderful country, specially blessed by Providence with boundless riches awaiting development. Her people are vigorous, progressive and hospitable beyond belief. In Canada there is a great and powerful system of machinery---of Governments, of hydro-electric plants, and of transportation---grinding on insufficient grist. She lacks population and capital which alone can produce the grist for the mill. The whole problem needs tackling in a big way by big brains."

Thus writes the Rt. Hon. Lord Middleton, in a special supplement published by the Yorkshire Post, Leeds, Eng.

Coal miners at Estevan have struck for improved wages, better housing conditions and lower prices at the companies' store, states news despatches. Until comparatively recently this field was never organized and wages were low in comparison with Alberta. About ten years ago J. S. Woodsworth, now Federal member for a Winnipeg constituency, made an attempt to organize the miners, and P. M. Christophers, former provincial member for this constituency, also visited the field. The operators managed to stall off their attempts at organization, even to the point of inducing P. M. to take a ride and leave him across the border in North Dakota, for which he later brought a charge of kidnapping, which was heard in the supreme court of Saskatchewan.

It is a low grade lignite which is mined there, and will not stand storage for long, because it disintegrates quickly. Very little mineral is carried on in the summer, and in the winter many leave farms in the district and work in the mines. This makes organization difficult, as many of the so-called miners are farmers half of the year. With the development of the field, largely owing to the provincial government indirectly aiding the industry, it could not be expected that the operators could stall off indefinitely organization of the miners. In a measure it made for unfair competition to bar the miners union. Other fields were paying a union wage, while the lignite area was paying much below that and not providing the facilities that Alberta mines are compelled to.

If legislation compels a certain wage scale to be adopted in one section of the country, the rule should apply to cover all fields that are engaged in a competitive business. Investigation may reveal there is some good reasons for the strike for higher wages in the lignite area of Saskatchewan.

A forecast of trouble to come is indicated by the refusal of mine operators in southern Saskatchewan to negotiate with the so-called Mine Workers Union of Canada, which is now subservient to Communistic dictatorship. If the coming trial of Communist organizers and agitators proves that money has come from an organization outside of Canada or the United States to finance the propagandists in this country, it might be predicted that the organization will be wrecked.

There was a semblance of union here before paid agitators appeared. It is no secret that recognition will not be accorded to the present organization as a union representing the miners. Men who worked for organized labor in this district for years have been ruthlessly swept aside because of the abuse and vilification most untruthfully hurled at them by men who never worked in a coal mine, but earned their living by stirring up discord and distrust. Sad to relate, many followed their advice like so many sheep jumping a fence. They admitted the wolf to the fold, and now he is in, the unions are in a worse mess than ever.

If the gas pressure continues to decrease at the alarming rate reported, there is a possibility that the old standby---coal---will come into use to generate gas to supply Calgary and other places. Certain it is that Turner Valley cannot be robbed at the present rate for many years, and investors in properties there may well desire a raise in gas rates, as is forecasted if the proposed pool of all companies materializes. Experts report a serious decrease in the past five years. What another five years may bring even the experts cannot foretell. Fields with plentiful supplies have petered out. They will continue to do so. There is still a field for coal.

A Grim Joke, Maybel---Agriculture owes a debt of gratitude to Henry Ford and other wealthy city men, who lose money heavily in farming, just to show farmers that farming pays.

Here and There

One thousand men will be employed and over \$500,000 expended on highway repairs in Cape Breton and Richmond counties, Nova Scotia, during the coming autumn.

Miss Pauline Garon, Montreal model, recently formerly of Hollywood, sailed on the Canadian liner "Montana" recently to make pictures in England and France.

Salmon taken in 1930 from British Columbia waters totalled close on 37,000,000 weighing more than 216,000,000 pounds. Number of fish 8,500,000 more than in the biggest previous salmon catch year of 1928.

The New Brunswick Government is preparing to face the problem of unemployment on a practical basis this winter and has instituted a registration system that will gather data from those who will gather to work as out-of-works and their families.

Sir Lionel Fletcher, captain of the British rifle team, which competed against Canadian shots at Toronto and Ottawa following the historic victory of the Canadian team at the Connaught Games, on his return to England. It is hoped that another Old Country team will compete in Canada next year.

Queen Helene of Romania and her sister, Princess Irene of Greece, gave British railroad officials a tour of the Canadian Rockies in London to Scotland third class. The Queen smilingly declared that she was very comfortable and did not want people to know she was travelling.

The name of Admiral of the Fleet Earl Mountbatten has been added to the long list of distinguished travellers over Canadian Pacific steamship and rail lines. "Hell-fire Jack," as he is affectionately called, arrived in Montreal on Aug. 26, on the liner "Duchess of York," to open the Canadian National Exhibition, at Toronto.

Hector McDonald, of Montreal, was winner of the prize offered by E. W. Beatty, chairman and president of the Canadian Pacific Railway, for the best speech between officers representing the 17 Scottish militia units of Canada, at the Highland Gathering recently held in the grounds of the Banff Springs Hotel, Banff, Alta.

Among recent guests at Banff were Congressman and Mrs. Fred G. Gilchrist, of St. Paul, Minn., D.C., and Newark, N.J., on their way to the convention of the National Federation of Federal Employees at Ottawa. The Gilchrist's delighted with their stay at the Banff Springs Hotel, punctuating a journey from Montreal to the Pacific Coast over Canadian Pacific lines.

H. M. King Prajadhipok of Siam, accompanied by Queen Rambai and a royal suite, has been seeing real western life with the Banff Spring Hotel as headquarters. He was recently made a member of the Royal Canadian Mounted Police, following a pack-train expedition, and also attended a rodeo staged for him at Mrs. George Brewster's ranch near Kamloops, Alta. • His Majesty has also devoted considerable time to photography, golf and fishing.

Gulf Stream Is Extending And Cold Arctic Waters Receding Much Farther North

Discovery that the Gulf Stream has increased in extent to an unusual degree this year has been made by investigators on the United States patrol boat "General Green," which has been engaged for four months in exploration work in northern waters.

The explorers, including Commander Ricketts and Mr. Olaf Moesby, commander of the U.S. Hydrographic Survey ship "Nansen," have further discovered that, owing to the exceptionally high temperatures, the cold arctic waters had receded much farther north. Remarkably few icebergs were seen. Encroachment of the Gulf Stream upon the western slope of the Newfoundland banks was found between the forty-first and forty-second parallels to longitude 46° west, then turning sharply north and making another encroachment toward the eastern slope. Temperature at one point in the area was 20 degrees higher than last year.

The "General Green" expedition started north in July to study ocean currents, salinity, temperatures at various depths and the ice drift between Newfoundland banks and waters as far north as Hudson Strait. Records of temperatures and salinities at various depths were taken at 122 points and 2,000 soundings made in many areas between Labrador and Greenland, never previously surveyed. No field of ice was encountered on the Labrador Coast, and only 90 icebergs were found in Hudson Strait.

Two hundred icebergs were sighted on the Greenland Coast while anchored against the Invagat Glacier. Three members of the Courtauld expedition, surveying the Greenland ice cap, arrived on board. They were Mr. James M. Scott, Mr. Andrew Stephenson, and Lieut. Martin Lindsay. All had travelled 400 miles afoot over the ice caps. They had made exceptional time and were in excellent condition. Commander Ricketts, beyond stating that fine weather had been encountered, that the crew had enjoyed the best of health, and that the programme had been completed, was reticent regarding details of work as first reports must be made to headquarters.

A Great Benefactor

Fulman, Inventor Of Sleeping Cars, Born a Hundred Years Ago

One hundred years ago a man named Fulman was born. When he died he left a great fortune and a name that was sure to last. It was Fulman who conceived the idea that something more comfortable than the old compartment carriage might run upon railways. His first cars, with gangways from end to end and provided with comfortable seats and tables for passengers, made their appearance in America between sixty and seventy years ago. They were an immediate success, and in 1874 the Midland Railway Company imported four of them to Great Britain. They were sent over in parts and put together on arrival. Fullmans are now seen on nearly all the railways in the world.

Maple Sugar Production

Maple sugar and maple syrup produced in Canada in the spring of 1931 had an estimated value of \$3,337,700, of which the former accounted for \$300,800 and the latter \$2,606,900. There were 5,484,100 pounds of maple sugar produced and 1,314,700 gallons of maple syrup, the Province of Quebec leading by a wide margin and followed by Ontario.

Work Only Thing Needed

Depression? Take a look at the endless string of motor cars, the throngs at the summer resorts, a few vacant seats at the theatres and similar things. There is plenty of money in the country, plenty of food and plenty of everything else — excepting work. Work alone will cure the depression.

"Why don't you stop applauding? The singer's going to sing again."

"Well, as long as I applaud she can't start singing again!" — Lustige Kölner Zeitung, Cologne.

W. N. U. 1930

Western Fish Hatcheries

Record Distribution Of Fry Made In Prairie Provinces Last Year

Last year saw a record distribution from the fish hatcheries of the Prairie Provinces, according to a report of the fish culture division of the Department of Fisheries at Ottawa. From the Manitoba hatcheries there was a whitefish distribution of 130,000,000, and a pickerel distribution of 107,000,000 as well as an output of salmon trout to the number of 195,000. From the hatchery at Port Qu'Appelle, Sask., nearly 15,610,000 eggs, etc., were sent out while the Alberta distribution amounted to 103,250,000.

Alberta Wool

Opportunity For Development Of Woollen Industry Is Planted Out

Splendid opportunities exist in Alberta for the development of a woollen industry for the processing of native-grade wool, in the opinion of Dr. Thomas Oliver, editor of the Scotch Free Journal and member of the staff of the Scottish Wool Technical College at Galashiels, who recent visitor to Calgary. Alberta wool grades are among the best in their class in the world, he pointed out.

Winnipeg Newspaper Union

By Annette

THE JACKET DRESS PROVES ITSELF

The jacket suit of plain or printed bat crepe or light weight woolen holds a prominent place in the new mode.

No wonder for its popularity. It is so thoroughly comfortable, chic and practical.

The simulated tuck-in blouse is youthful in this crepe woolen suit with crepe silk blouse. The scalloped collar and jacket front are softly draped.

The slip-on jacket with adjustable full flaring skirt are snugly fitted with a shaped yoke.

Style No. 623 is designed in sizes 16, 18, 20, 22, 24, 26, 28, 30 and 32 inches bust. The 36-inch size requires 4½ yards of 38-inch material with 1½ yards of 39-inch contrasting.

Red and white printed crepe silk with white crepe blouse is refreshingly youthful.

Light navy, blue bat crepe with white is exceedingly becoming.

White, mixed jersey, shantung and linen also suitable.

Price of pattern of 23 stamps in coins (coin preferred). Wrap coin carefully.

Employment in Canada

Pronounced Increase Is Indicated In Prairie Provinces

Employment in Canada at the beginning of August showed a further upward movement, according to statements tabulated by the Dominion Bureau of Statistics from 7,878 firms, whose payrolls aggregated 966,233 persons, as compared with 945,419 on July 1.

The index number stood at 103.2, compared with 103.8 on July 1, 1931, and 118.5, 127.8, 119.5, 110.5, 109.5, 97.5, 95.8, 101.4, 94.2 and 90.0 on August 1, 1930, 1929, 1928, 1927, 1926, 1925, 1924, 1923, 1922 and 1921, respectively. The employers making returns therefore reported smaller payrolls than at the beginning of August in the preceding four years, but the index of employment was practically the same as in 1926, and was higher than in the five years, 1921-25.

Construction reported a very large gain, chiefly due to important works undertaken for the relief of unemployment in Saskatchewan, the tenancy was also favourable in mining, communications, transportation and services. On the other hand, logging continued to grow quiet, and there were also losses in manufacturing and trade.

Greater activity was shown in the prairie provinces; employment declined in Quebec, Ontario and the Maritime Provinces, while very little general change was indicated in British Columbia.

A very pronounced increase in employment was indicated in the prairie provinces, where 1,162 employers reported 156,504 workers, or 24,561 more than at the beginning of July. This increase, which was the largest ever reported in the prairie provinces, was almost entirely due to road work undertaken for relief of unemployment in Saskatchewan. Services and telephones also showed moderate improvements, but manufacturing, transportation and building construction were weaker. Smaller gains had been reported on August 1, 1930, and the index then was rather lower than on the date under review.

Woman Makes Good In Business

Quite Fair and Later Becomes President Of Large Company

Refused a \$1 week 22 years ago, Mary Dillon stepped out and made herself president of the \$12,000,000 Brooklyn Borough Gas Company, just to prove that women can make good in business, she explained.

It took a little time after she had quit her job passing out bathing suits in a Coney Island bath house. First she became "son of office boy" for the gas company. Then, in 1925, after 22 years of steady promotion, she was made president of the firm.

She advises other women ambitious for a successful business career to get married and go to work. Once married, she said:

"They aren't then so preoccupied with the man question. A career in itself can't satisfy woman emotionally, and a business woman with an unhappy life carries over her emotional upsets to her work."

A dwelling house of welded steel and brick has been constructed in New York.

POLO PLAYER RESCUES KING'S COUSIN

Lady Louis Mountbatten (above), wife of a cousin of King George, and one of the richest women in the world, was rescued from drowning off Cape Antibes, France, by Stephen Sanford (insert), star American polo player, when she was seized by cramps. Brought ashore in a state of collapse, Lady Mountbatten was not revived for some time.

Tramp Steamers Of Late Years Have Been Forced To Give Way To Competition Of Ocean Liners

Good Market For

Saskatchewan Cattle

Stock Raiders Have Splendid Opportunity For Export To Britain

During the two month period ending August 20th, Saskatchewan exported seven hundred and eighty-nine head of beef cattle to Great Britain. These figures have been compiled by W. Waldron, Provincial Markets Commissioner, from weekly returns on the export cattle trade furnished by the Dominion Live Stock Branch, Ottawa.

A calculation made in London shows that liners, both passenger and cargo, running on regular routes and time, as contrasted with the tramp, comprise 70 per cent of the world's tonnage. Liners totalled but 18 per cent of the world's tonnage in 1913.

The change has been particularly noticeable in the port of London, where, outside the timber trade, there are very few tramps trading with the liner ports. Now everybody prefers to send goods in "parcels" up to 10,000 tons or more on one of the regular line ships.

Canadian grain for instance, used to cross the Atlantic and Pacific in tramp steamers. Now a large part of it comes across the oceans in the Canadian Pacific's fast cargo liners or in the holds of passenger ships.

Seas affairs in general have been changed considerably by the shift from tramp steamer to liner. The seaman no longer signs on for a voyage "not exceeding two years," but can tell his wife almost to the day when he will return. Jobs are standard for cargo liners stick to their schedules.

But with the passing of the tramp steamer passes some of the last vestiges of the pioneering of another day, and one of the last links between the ship owner and the merchant adventurers of the seventeenth century is broken.

Advance In Public Health

Mortality Amongst Younger People Is Still High, Says British Medical Officer

Although great advance had been made in public health this century it was not possible to be satisfied with the position of the general health to-day.

Dr. W. G. Willoughby, medical officer for East Lancashire, said in his address as president of the British Medical Association, at the recent meeting in Earls Court, London:

"The pockets of Uncle Sam soon will bulge with more than \$5,000,000,000 in gold.

A survey of the gold situation showed that it will be only a matter of a short time before gold holdings in the United States will top the five billion mark for the first time in the history of any nation.

The gold reserve on August 26 amounted to \$4,992,000,000, while incoming shipments from South America increased this amount.

A shipment of \$4,255,000 is being sent to New York from Argentina on the steamer "Western Prince," and Uruguay plans to send \$5,000,000. In addition, receipts of \$965,000 from Mexico was reported by the Federal Reserve Bank of New York.

Five Billions In Gold

Gold Holdings In United States Will Soon Be Greatest-Ever

The pockets of Uncle Sam soon will bulge with more than \$5,000,000,000 in gold.

A survey of the gold situation showed that it will be only a matter of a short time before gold holdings in the United States will top the five billion mark for the first time in the history of any nation.

The gold reserve on August 26 amounted to \$4,992,000,000, while incoming shipments from South America increased this amount.

A shipment of \$4,255,000 is being sent to New York from Argentina on the steamer "Western Prince," and Uruguay plans to send \$5,000,000. In addition, receipts of \$965,000 from Mexico was reported by the Federal Reserve Bank of New York.

The tramp steamer which used to ply to the strange ports of the world seeking cargoes probably soon will join the sailing vessel in near-extinction.

A calculation made in London shows that liners, both passenger and cargo, running on regular routes and time, as contrasted with the tramp, comprise 70 per cent of the world's tonnage in 1913.

The change has been particularly noticeable in the port of London, where, outside the timber trade, there are very few tramps trading with the liner ports. Now everybody prefers to send goods in "parcels" up to 10,000 tons or more on one of the regular line ships.

Canadian grain for instance, used to cross the Atlantic and Pacific in tramp steamers. Now a large part of it comes across the oceans in the Canadian Pacific's fast cargo liners or in the holds of passenger ships.

Seas affairs in general have been changed considerably by the shift from tramp steamer to liner. The seaman no longer signs on for a voyage "not exceeding two years," but can tell his wife almost to the day when he will return. Jobs are standard for cargo liners stick to their schedules.

But with the passing of the tramp steamer passes some of the last vestiges of the pioneering of another day, and one of the last links between the ship owner and the merchant adventurers of the seventeenth century is broken.

Reveal Rich Deposits

Valuable Mineral Discovery Is Made At Peers, Alberta

The miners have been hurrying to the west as government authorities announced assays from the mining development west of Edmonton revealed rich deposits.

The spirit of the Yukon days was on as those who follow the illustrious trail of precious ore trekked to the McLeod development west of Edmonton, where gold, silver and platinum have been found in paying quantities.

The Dominion Department of Mines announced that assays had shown high grade silver, an assay of 29.8 cents per cubic yard of coarse and fine gold and heavy traces of white metal and the platinum group. The valuable deposits are exceeding valuable.

The discovery on the McLeod River at Peers, Alberta, was made in the gravel just under the surface. Government officials say the location is ideal for placer development.

Deportation From Canada

Many Who May Wish To Be Deported Due For Disappointment

Deportation from Canada does not depend upon the willingness or unwillingness of persons, it was stated at the Department of Immigration, Ottawa. When shown a press report from Regina, Sask., which told of the city council preparing lists of voluntary deportees, department officials said the deportation laws were not sufficiently elastic to enable men and women to be transported back to their own countries simply by applying for it.

Throughout Canada, said one official of the department, a great number of people who were not deportable, had expressed their willingness to be deported. This, however, did not enable the department to pay their passage back to their native lands. If their cases did not fall within the deportation laws they remained in this country despite their expressed willingness to be deported.

The deaf man misses a lot, but he doesn't have to listen to his neighbor's radio.

Priceless Furs From North

Nearly half a million dollars' worth of furs gathered from the sub-Arctic barren lands, passed through The Pas, Manitoba, recently, en route to Winnipeg and London, England. The shipment, 75 bales in all, was composed of priceless pelts, silver fox, white fox and a few choice beaver skins.

Easily Identified

The lady was quite flattered by the little boy's recognition.

"Do you know all of your mother's friends?" she asked.

"No, ma'am," replied the lad, "but I can tell you by your feet."

"You're not touching my papers, are you, Jack?"

"I'm cutting out paper dolls, Dad, but I'm only using the written sheets." — Kasper, Stockholm.

Brown: "Do you know, I'm losing my memory. It's worrying me to death."

Jones (sympathetically): "Never mind, old man. Forget all about it."

The London Opinion.

WORLD HAPPENINGS BRIEFLY TOLD

Frauen Marga von Eltzdorf, German air woman, landed at Haneda aerodrome, Tokyo, to complete a solo flight from Berlin in 12 days.

An order for approximately 750 cars of this year's British Columbia puchard oil has been placed with three firms in British Columbia by Messrs. Proctor and Gamble of Ivorydale, Ohio.

Since the opening of the Panama Canal in August, 1914, tolls collected have totalled more than \$250,000,000, and the cargo passed through the canal aggregated 300,000,000 tons.

Sir Hall Caine, noted British novelist, died, August 31, at Greba Castle, his home in Douglas, Isle of Man, where he had been seriously ill for some time. He was suffering from a heart ailment. He was 78 years old.

South Africa was Canada's best customer for automobiles during the month of July, according to a report issued by the Dominion Bureau of Statistics. South Africa's purchases totalled \$117,160.

Nancy Lady Astor, first woman to take a seat in the British Parliament, may be threatened with an independent Conservative challenge from her constituency at the next general election.

A. E. Milne, the field telegrapher who in March, 1918, dispatched Marischal Field's message, "One back to the wall," died while on vacation at Kirkwall, Orkney Islands. He was 51 years of age and a resident of Manchester.

Total amount invested by Canada in all canal systems throughout the Dominion is \$233,603,586. Hon. R. J. Manion, Minister of Railways, stated in the House of Commons, Annual revenue from these systems is \$536,727.

The title of Celery King of the United States and Canada has been awarded to James Little, St. Catharines, Ontario, district farmer. According to word received from Cincinnati, Ohio, where an international fair was held.

Queer Thing To Steal

Because tombstones attracted him, Juan Valadez must spend nine months in jail. He was found guilty of stealing tombstones from the municipal cemetery in Juarez, opposite El Paso, in Mexico.

"I don't know why I took them," Valadez said.

"You can think it over nine months," said the court.

Leisure is sweet to those who have earned it, but burdensome to those who get it for nothing.

"You have been robbed! What was the robber like?"

"Um—a man—a little bigger than I am!"—Buen Humor, Madrid.

Lesson: Acts 14; Ephesians 6:10-20.

Devotional Reading: Isaiah 54:9.

Explanations and Comments

Paul Cures a Cripple At Lystra, verses 8, 11.—There is no mention of Paul's cure of a cripple; probably there was none, the term not being very numerous. Seeking a place of public resort where they might preach, Paul and Barnabas probably chose a marketplace. Here was a cripple, who in all likelihood, was brought each day by his friends and left at the temple to beg, just as many other cripples were left at the Gate Beautiful, Acts 3, 2.

Professor Ramsay notes the marked emphasis put upon this man's physical infirmity: "a cripple from his mother's womb;" "he who never had walked," the three phrases which, like the beats of a hammer, compel the reader's attention.

This cripple heard Paul speak. The sense of the verb in Greek suggests repetition, on several occasions, of the words of the gospel which he had listened and had come to accept the truth. It may be that Paul told how Christ had performed many wonderful cures, others, however, hope thus aroused in the cripple's heart began to manifest itself in his face so that Paul, fastening his eyes upon him, said, "see that he is cured." The crowd, seeing that he was cured, made noise, stopped his sermon, to say, with a loud voice, "Stand upright on thy feet." The crippled man stood upright.

Hailed As God, verses 11-13.—This miracle of healing electrified the whole city. Some one raised the cry, "The gods are come down to us in the likeness of men." The people, by the crowd, and repeated in their native dialect, the speech of Lycœaon. And they called Paul "Menoy," and probably because of his commanding presence, they called Barnabas "Jupiter."

The Multitude Restrained From Their Purpose, verses 14-18.—It may have been the singer of the work song, who gathered around their abode that brought Paul and Barnabas forth. As soon as they became aware of the purpose of the crowd, "however, and with great fear, went to show by sign as well as by words their repudiation of such worship, they sprang into the midst of the crowd, and though it was night, an end to the delusion of the people."

"Men!" they now cried (as Moffat's translation forcibly expresses it); "what is this you are doing? We have not come here to do such things as you do. The gospel which we are preaching to you is to turn from such futile ways to the living God!"

The Girl—"I should think you're feel as happy as a king when you're in the army."—Aviator—"Happier! I'm an ace."

Museums in the United States have doubled in number since 1906.

For World Peace

Vicount Cecil Believes Disarmament Would Cure Unemployment

Disarmament is the most effective means of curing the unemployment ills of the world, Viscount Cecil of Chelwood, said in an interview with the United Press.

Viscount Cecil, better known as Sir Robert Cecil, is a veteran in the campaign for international peace and disarmament. He is one of the most ardent supporters of the League of Nations as a means for preserving peace among nations.

"The world is suffering from a want of confidence," he said. "Disarmament, huge capital would be released. If Britain could throw out the world were quite confident they might count on 50 years of uninterrupted peace, they would regain their courage, begin new undertakings, and develop their present business."

"I have not the least doubt that if we could effect large economy in armaments, huge capital would be released for other and much more remunerative business. Disarmament is equally desirable from any way it is regarded. Any money spent for armament is more than thrown away, economically speaking."

Viscount Cecil admitted the possibility that a sudden decrease in the building of armaments would throw many people out of work, but added that the best that could be hoped for was a gradual reduction, which would enable armament firms to change from armament to peaceful pursuit. The change, he said, would be for the greater benefit of the world industrial outlook.

"I believe that the United States attitude that it is not desirable to grant financial facilities which will permit preparations for war is fully appreciated in Europe," he said. "At any rate, Britain largely sympathizes with such an attitude."

Asked if Britain resented reports that the United States would insist on armament reduction if she granted further loans, Viscount Cecil replied: "I think President Hoover's line is quite right."

Montreal Port

British Engineer Speaks Highly Of Efficiency Of Grain Handling Facilities

High praise for Montreal as a grain handling port was forthcoming recently from a noted authority.

"I think Montreal has the most efficient grain handling facilities of any port in the world," said Alexander Gibb, British engineer and expert on the construction and administration of ports, said following a four-hour inspection of the harbour. During that time he saw grain discharged from lake steamers, and from railway cars by the mechanical unloaders and the shakers. He followed the grain through the elevators, walking along miles of conveyors, and saw it loaded into ocean liners for carriage to some foreign port.

Why is snow easier to understand than any other sort of weather? Because it is the only one of which you can see the drift.

The Girl—"I should think you're feel as happy as a king when you're in the army."—Aviator—"Happier! I'm an ace."

CHAPTER XXIX.—Continued.

"If we had a Nancy, and—another mother . . ."

She looked up at him with pleading eyes. Halliday winced, and Uncle Sim said tactfully: "I don't doubt, little girl, but what Sonny'd be real proud to lend you his mother, and his little sister, too, most any time. And you got a daddy you think a whole heap of, or my name ain't Simeon Augustus Bartlett."

The child looked up at Halliday with a smile that was sweet as a rose.

"Martha Halliday," said Julie from the window, "you got to come right in now and get ready if you're going to church with me."

"Seems like Julie Nipps is gettin' pretty regular in her devotions," commented Simeon dryly. "Ain't seen her missin' Sunday three weeks."

"It's her permanent wave," said Martha explained soberly. "She says there's no use having it if you don't go somewhere to show it off. It cost twenty-five dollars sides her carfare to Summerfield."

"Well, well," chuckled Simon, "it would be a pity if the Lord was to overlook it after Julie's goin' to all that expense. I've heard of some strange things bein' the cause o' salvation, Halliday, but I do'no' but havin' yer hair crimped, is the strangest yet. You run along, child, and get ready like Julie says. 'Tain't everyone has the chance to go to church along beside an expensive head like that."

"When I grow up I'm going to have one, too," Martha announced seriously.

"You won't need one," smiled Halliday, rumping her curls with a tender hand. "Your good fairy gave you one when you were born."

**"SUFFERED
EVERY MONTH"**

"WHEN I was twelve years old my mother died and I had to take Lydia E. Pukham's Vegetable Compound but it wouldn't. If I had I might have been a well girl now. I have suffered terribly every month."

"The girls where I work used the Vegetable Compound and urged me to try it. It helped my nerves and I had to keep on until I am well and strong." Miss Rose Loma, 6 Brighton Avenue, Toronto, Ontario.

**Sylvia E. Pukham's
VEGETABLE COMPOUND**

Flake Lye

* Lye should never be dissolved in hot water.

KEEP a tin of Gillett's Lye handy and you can kit your kitchen cleaning time in two.

Greasy pots, pans and dishes, soiled walls, the kitchen floor, etc., etc., all can be more quickly and thoroughly cleaned with a solution of one tablespoonful of Gillett's Lye dissolved in a gallon of cold* water.

To keep drains free-running, pour a small quantity of full strength Gillett's Lye down them each week and they'll never clog with dirt and grease accumulations.

Gillett's Lye has many handy household uses. Send for the free Gillett's Lye booklet explaining how it will make all your cleaning easier.

Canadian Banks Sound

Have Withstood Depression While Hundreds in States Have Failed Canadian banks are blamed for many things from time to time, and there are those who would make extensive changes in the banking system if they had the opportunity, but for business people and the general public there must be a great source of satisfaction in the stability they have shown during the stress of recent months.

At the same time hundreds of banks in the United States have failed and the depositors have lost vast sums of money. Three large banks in Toledo, Ohio, succeeded to close their doors, and a fourth faced with its affairs was taken over by the State Banking Department. Assets worth more than \$100,000,000 are tied up. At the same time eleven savings associations under the building and loan laws of Ohio said they would have to cease permitting withdrawals.

No situation such as this has faced any Canadian community nor any depositor in a Canadian bank in the present emergency. Unquestionably there is much to be said for a system which puts such rigid safeguards about the people's money.—Ottawa Journal.

Convention Cancelled

Annual Meeting Of Canadian Clubs Will Not Be Held This Year

Announcement that the annual meeting of the Association of Canadian Clubs, scheduled to have been held in Regina, September 11 and 12, will not take place, came from Graham Spy, the association's national secretary.

While no official reason for the decision was given out, it is understood that due to prevailing economic conditions the affiliated clubs of the association agreed to a recommendation of the national executive that this year's meeting be postponed.

According to a report made by Mr. Spy at a recent executive meeting, the association is concluding a successful year. There are now affiliated with the association 94 of the 105 active Canadian clubs from coast to coast.

Little Helps For This Week

"Every man shall receive his own reward according to his own labour." 1 Corinthians III. 8.

Our Father will no gentle death disdain; love, on the earth abounding, living, dying in home again. While the angel hearts that beat there still all tender thoughts retain.

—Adelaide Anne Proctor.

How shall we enter when for the golden gates roll back? Shall we go home as children whose homecoming is not only welcomed and watched for by the heart of Heavenly Fatherhood and the heart of Heavenly Brotherhood, but by many and many a one to whom we have given a smile or a word of love for Christ's sake?—Rose Porter.

Drakes Of Modern Times

Men Recently Sailed Across Atlantic In Small Boats

Ten little sailboats set out from Newport on July 4 for a race across the ocean to the Land of Plymouth. The winner, the 53-foot "Dorade," was into Plymouth Harbour almost exactly seventeen days out from this side. One of the others had to signal to a passing liner for supplies and to have two of her crew taken off after a storm that partially dismasted her. Having got what she needed, she set off again to make up for lost time.

To set sail across the North Atlantic in a fifty-foot yawl calls for a lot of courage to begin with. There are wicked summer storms that shake up even the biggest liners and in which these cockleshells would seem to have but the smallest chance of survival. To cross in seventeen days, some of these of light airs, means not only courage but the willingness to take every chance.

We marvel at the courage of the men of old who crossed the Western Ocean in their tiny ships, but the British and American skippers are their worthy successors. The ocean has not changed since 1492 and a 50-ton yacht in the grip of its waves could be just as helpless as a "Golden Hind" or a "Santa Maria." We still have our Drakes, our de Gamas and our Magellans, even in what is said to be a softer age.

Mothers' Worms' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective is painless.

Turkish Women Lose Jobs

Street Cleaners Talked Too Much and Neglected Work

Turkish women are swallowing their first defeat since the Kemalists opened all doors to them; they have been found wanting at the job of street cleaning.

"No more women street cleaners," announced the Istanbul municipality. "They have been given a four-year trial, and the streets of the city of the Golden Horn are dirtier than ever. Women fell down on the job because being in the streets gave them too irresistible an opportunity for leaning on their brooms and gossiping."

City Appeals To Women

U.S. Census Shows More Men Remain On Farm

Girls and women of the United States were married to more than half the men in the greatest trek from the farms to the cities in the late decade, the Census Bureau reports. Women now outnumber men in the cities in a ratio of 100 to 98. That the city has appealed most to women is shown in the presence of 9,000,000 more women in the city now than on the farm.

The female urban population is 34,000,063, while 25,837,903 remain in rural areas. The urban male population is 34,154,760, while 27,982,320 live on the farm.

Persian Balm is magical in creating alluring complexions. A little gentle rubbing and your skin is regenerated, tonified with the youthful energy of youth. Charming, fragrant. Delightful to use. Cools and caresses the skin. Relieves all rheumatic and neuralgic pains. Stimulates and strengthens the body. Enhances and protects the loveliest complexion. Unrivalled as a perfect aid to beauty and charm.

Cultivating Walnuts In B.C.

Walnut culture in British Columbia is becoming quite successful and trees this year are producing a heavy crop.

Success has been quite marked in the Okanagan, the lower mainland and in Vancouver Island where the growers have been experimenting for a few years, and at Esondale where a

farm of walnuts was planted nearly ten years ago and will now probably yield about 1,600 pounds of nuts.

Offer Corn As Fuel

Burn-a-hushie-of-corn-a-day club will be formed in this part of Iowa this fall if present plans materialize and will excel in heating qualities and is suitable for a ton less than coal, farmer's choice of the plan says. Through the clubs it is proposed to eliminate the surplus with the hope of increasing the price of corn 25 cents a bushel.

The

Remington Portable

in four exquisite colors,
besides the sleek, ever
popular black.

The Remington Portable, in addition to being the most beautiful, is also the smallest, lightest and most durable four row keyboard portable made. It is equipped with every essential refinement found on big machines.

An Ideal Gift

When the moment for the opening of the Christmas packages arrives--that moment of delicious thrill that no one ever quite loses--few gifts will give more delighted satisfaction than the glistening beauty of a Remington Portable. A gift for the entire family, for the college student, for the doctor, the pastor, in fact anyone who writes.

This Christmas let the Remington Portable bring lasting joy to someone on your gift list.

Local News

Coleman Homing Society thanks all who donated prizes and cash for the pigeon flights during the season.

Mr. and Mrs. O. Williams and family spent the week-end at Lethbridge.

Mrs. Howarth left on Saturday to spend a vacation at Carthew Lodge, Waterton National Park.

Mr. and Mrs. R. J. Haining of Turner Valley were visitors last week with Mr. and Mrs. T. Flynn.

Mrs. Wilcox, of Halifax, N.S., is visiting her daughter, Mrs. J. A. McLeod.

Hubert W. Clark, of the Bank of Commerce staff, Taber, spent the week-end holiday at his home here.

Col. R. F. Barnes and Supt. J. A. McLeod took part in the golf tournament at Lethbridge over the week-end.

Five Boy Scouts from Michel with Scoutmaster George Rossington cycled over to Coleman on Saturday and returned on Monday.

Dr. DeLong motored to Calgary for the week-end, and was accompanied by A. E. Graham and G. R. Powell.

Miss Emma Antel, who last term completed her studies in Grade 12 of Coleman high school, has commenced studies at Calgary Normal.

A good daily paper, a good Canadian magazine and your own local paper are very useful in the home. Lethbridge Herald, Maclean's Magazine and Coleman Journal.

Victoria Rebekah Lodge will hold an anniversary whist drive and dance in the Oddfellows hall on Saturday, Sept. 12, commencing at 8 p.m. Admission is 50c, and everybody will be welcomed.

Mr. and Mrs. H. V. Hummel returned last evening from Penticton, after several weeks holiday. They came in the private car of President Warren, of C.M. & S. Co. Ltd., on train 12.

Every time Francis Kilgannon is seen driving his smart delivery cart with orders from Leosky's meat market, one is reminded of trotting horses at the races. Steve Leosky was the builder. Possibly he is contemplating training a few dark horses.

Mr. and Mrs. A. S. McLintock and children returned on Monday from Winnipeg, where they had been spending a vacation. They motored from Winnipeg in two days, a distance of approximately 900 miles.

On the list of teachers last week the name of Miss Edith Hayson was omitted, who is teaching Grade 2 as in former years. Mr. John McDonald has been appointed to the staff for Grades 4 and 5, since the list was published.

Frank Coogrin, a former Collemanite, proved himself the "king of swat" in the Custer d'Alene Valley League this season with 14 hits in 26 times to bat. This year he has been 100 per cent baseball player, states the Kellogg bulletin.

J. C. Creegan, of the bank staff, Chas. W. McKinnon, C.P.R. agent, and Maurice W. Cooke left on Saturday to spend a holiday at North Fork. The rain and snow of Monday and Tuesday cut their holiday short, and they returned on Wednesday.

Mickey Hennessey offers a hand some reward for the recovery of his boat, which has disappeared at Crows Nest lake. Mickey occasionally takes a few days rest for meditation and reflection, with a fishing rod to while away the hours. If the boat has been scuttled, well that's the end of it! Mickey will have to stick to the shore line.

Mrs. Alex. Beck was hostess at a reception yesterday afternoon at Star Creek ranch in honor of Mrs. James Scott. 28 ladies from Coleman and Bellevue were present, and Mrs. Beck was assisted by her daughters, Mrs. A. J. Barbour of Bellevue and Mrs. Norman McAlley. The presentation of a very fine colored enlarged photograph of Crows Nest mountain was made to Mrs. Scott, with a short address bearing the names of the ladies present.

Trains diverted from the main line, owing to the washing out of a trestle bridge near Albert Canyon, have been passing through the Crow's Nest Pass this week. With double headers and lots of steam, they do not even slacken speed as they pass through, but seem to snort in derision at having to come this way. Yet the scenery is just as good as on the main line. No need for them to be quite so smoky.

Despicable Thieves

Gene Howe, crew boss on the Glacier Creek forest fire, reports that a pair of boots were stolen from the forestry truck in Coleman. He would like to meet the thief. Frank Serak reports that his blankets were stolen whilst working on York creek fire.

Heavy Snowfall Completes Battle

(Continued from Page One) three "hell-roaring rounds" was advertised.

The danger is now over. There may be considerable smouldering of old moss and rotted wood in sheltered places. The total cost of the fire will, on a conservative estimate, be \$12,000, estimating the expenses for wages, provisions and transportation at roughly \$1,000 per day.
